PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate (B.Tech 2027) with hands-on experience across full-stack web application development, system integration, and machine learning model deployment. Proficient in Java, Python, JavaScript, React.js, Node.js, Flask, and MongoDB, with experience in REST API development, unit testing, technical documentation, and data privacy and security practices while integrating third-party financial and AI APIs. Seeking a Technology Analyst internship to translate business requirements into working technical solutions.

EDUCATION

Institute of Technical Education and Research (ITER), SOA University 2023 – 2027

B.Tech in Computer Science and Engineering | CGPA: 7.5 | Bhubaneswar, Odisha

Valley View School, Jamshedpur 2023

CBSE Class XII

Loyola School, Jamshedpur 2021

ICSE Class X

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Flask, Django

Databases: MongoDB, MySQL, SQLite

AI / ML: Scikit-Learn, Random Forest, NLP, OpenAI API, LLM Integration, Prompt Engineering

Tools & Platforms: Git, GitHub, Vercel, Render, Appwrite, Plaid API, Dwolla API

Core CS: Data Structures & Algorithms, OOPs, DBMS, Computer Networks, REST APIs, System Integration, Unit Testing

PROJECTS

SmartHealth AI — Disease Surveillance & Outbreak Prediction Platform Mar 2026

React.js, TypeScript, Flask, Python, Scikit-Learn, SQLite, Tailwind CSS, REST API, Vercel, Render

- Accomplished a production-ready 5-role public health platform, as measured by real-time outbreak risk prediction across 6 environmental parameters, by architecting 6+ REST API endpoints and system-integrating the Flask backend with the React frontend.
- Accomplished reliable 3-class outbreak risk categorization, as measured by validated model performance across rainfall, pH, temperature, and nitrate features, by training and testing a calibrated Random Forest model against held-out environmental datasets.
- Accomplished a maintainable, audit-ready platform, as measured by consistent onboarding across 5 user roles, by authoring technical and process documentation covering API endpoints, alert workflows, and PDF reporting modules.

QuestAI — AI Exam & Question Paper Generator May 2026

React.js, Flask, Python, Google Gemini API, NLP, MongoDB, PDF Processing, RBAC, Framer Motion

- Accomplished an 80% reduction in exam creation time for educators, as measured by automated generation of 3 question types with answer keys, by translating educator business requirements into an end-to-end Gemini API-powered generation pipeline.
- Accomplished secure, role-appropriate access for Educators and Students, as measured by controlled access across both roles during testing, by implementing and testing RBAC logic across the platform.

- Accomplished a self-service analytics experience, as measured by real-time visualization of difficulty distribution and topic coverage, by building a Recharts dashboard directly from generated question-set metadata.

Banking App — Full-Stack Digital Banking Platform

Dec 2025

Next.js, TypeScript, Appwrite, Plaid API, Dwolla API, Tailwind CSS

- Accomplished secure multi-account linking across 1000+ banks, as measured by protected session integrity across 5+ core modules, by integrating Plaid API under data privacy and security controls for handling sensitive financial data.
- Accomplished reliable ACH fund transfer workflows, as measured by consistent transaction tracking accuracy, by system-integrating Dwolla API with Appwrite authentication and enforcing protected routing across the application.
- Accomplished a 60% reduction in UI development time, as measured by reuse across 10+ components, by designing a modular, documented Tailwind CSS component library for consistent cross-module implementation.

ACHIEVEMENTS & ACTIVITIES

- Earned 3-Star Java Badge on HackerRank, demonstrating proficiency in core Java programming and object-oriented problem solving.
- Independently built and deployed 3 production applications integrated with 5+ third-party APIs (Gemini, OpenAI, Plaid, Dwolla, Appwrite) and real-time data pipelines.
- Active hackathon participant focused on rapid prototyping and full-stack product delivery under time constraints.
- Represented school at zonal-level cricket tournaments, demonstrating leadership, teamwork, and performance under competitive pressure.
